System studies of the use of industrial excess heat

Sarah Broberg Viklund

- Page 5, Paper III: The correct title should be “Biogas supported by excess heat – A systems analysis within the food industry” instead of “Biogas supported with excess heat – A systems analysis within the food industry”.
- Figure 3, page 14: The lower arrow should say Q_c instead of Q_h .
- Figure 9, page 37: The arrow going from “Alternative fuel use” to “Fuel input” should go the other way, i.e. from “Fuel input” towards “Alternative fuel use”. A correct figure can be seen in Paper VI (Fig. 1).
- Table 4, page 45: Clarification - “Industrial excess heat [$\text{kg}/\text{MWh}_{\text{heat}}$]” should say “ CO_2 emission benefit from delivering excess heat [$\text{kg}/\text{MWh}_{\text{heat}}$]”, thus negative figures means increased emissions.
